1. Personal information

- Full name: Christos Gkenas
- Date of birth: 02/11/1975
- Nationality: Greek
- Address: MARE – Marine and Environmental Sciences Centre, Faculty of Science, University of Lisbon, Campo Grande, 1749-016 Lisbon, Portugal
- Tel. / Phone: +351 217 500 000 (ext. 28182)
- Email: cgkenas@ciencias.ulisboa.pt; chrisgenas@gmail.com
- ORCID: 0000-0002-9863-2289
- Scopus Author ID: 35368530100
- Web of Science ResearcherID: B-4588-2012

- Number of citations in Scopus (excluding self-citations): 342
- h-index in Scopus: 12

2. Main research topics in freshwater ecology

- Freshwater ecology and aquatic biodiversity under environmental change, with emphasis on how hydrological alteration, drought, warming, fragmentation, and biological invasions affect community structure and ecosystem functioning.
- Ecology, evolution, and conservation of freshwater fish and other aquatic taxa, focusing on predator-prey dynamics, habitat connectivity, and human impacts
- Ecological impacts, patterns, and management of invasive species in freshwater ecosystems
- Quantitative ecology and multivariate analysis, including statistical modelling in R, analysis of ecological datasets, and reproducible workflows for environmental data.
- Project coordination, scientific writing, and knowledge dissemination in collaborative research settings, including supervision, technical reporting, and peer-reviewed publication.

3. Professional experience

- 2019 – present: Junior researcher at Marine and Environmental Sciences Centre (MARE), Faculty of Sciences, University of Lisbon
- 2015 – 2019: Postdoc researcher at Marine and Environmental Sciences Centre (MARE), Faculty of Science, University of Lisbon
- 2013 – 2015: Postdoc researcher at the Center of Oceanography, Faculty of Science, University of Lisbon

4. Academic qualifications

- 2013 Ph.D. in Fish Ecology
  Laboratory of Zoology, Department of Biological Applications & Technology, University of Ioannina
  Thesis title: Ecology of Gobiidae species in inland waters of Western Greece with emphasis on *Economidichthys pygmaeus* (Holly, 1929) in Lake Pamvotis
- 2001 M.Sc. in Shellfish Biology, Fisheries and Culture
  School of Ocean Science, University of Wales, Bangor, UK
  Thesis title: Burrowing and shell scarring in Bivalves: The effect of sediment type
- 1998 B.Sc. in Fisheries and Aquaculture Technology
  Technological Educational Institute of Western Greece
  Thesis title: Water quality of Messolonghi Eparchy

5. Scientific production

5.1 Peer-reviewed journal articles

7. Participation in Scientific Projects

7.1 Coordinated research projects

2018 – 2022: ISO-INVA: Quantifying food web dynamics in invaded stream communities (Ref: LISBOA-01-0145-FEDER-029105 & PTDC/CTA-AMB/29105/2017)
Funding: COMPETE2020/Fundação para a Ciência e Tecnologia (FCT)
Budget: 236.187,46 €

Role: Principal Investigator

- Designed, coordinated and conducted a research project to understand ecological impacts of invasive fishes on Mediterranean freshwater ecosystems
- Managed a research team: 1 full-time post-doctoral researcher and 2 part-time research technicians
- Disseminated research findings through oral and poster presentations at scientific events
- Developed and implemented experimental research designs combining field sampling, stable isotope analysis, and species distribution modeling
- Prepared and delivered oral and poster presentations at international scientific conferences

7.2 Participated Projects

2022 – 2027: LIFE PREDATOR: Prevent, detect, combat the spread of *Silurus glanis* in south European lakes to protect biodiversity (Ref: LIFE21-NAT-IT-PREDATOR)
Funding: LIFE-Programme
Budget: 586.000,00 €
Role: Team member

- Conducted field studies employing various fishing techniques (electrofishing, gill-nets, seine-nets, long lines) to collect fish samples and environmental data
- Implemented advanced statistical tools to evaluate ecological data
- Prepared and presented conference communications

2022 – 2025: MEGAPREDATOR: A giant on the water: from predation pressure to population control of the European catfish (*Silurus glanis*) (Ref. PTDC/ASP-PES/4181/2021)
Funding: Fundação para a Ciência e Tecnologia (FCT)
Budget: 249.543,51€
Role: Team member

- Conducted field studies employing diverse fishing techniques (electrofishing, gill-nets, seine-nets, long lines) to collect fish samples and environmental data
- Applied statistical methodologies to analyze ecological data
- Prepared and presented conference communications

2022: Evaluation of the ecological consequences of hybridization of the invasive *Alburnus alburnus* with native species.
Funding: MARE (mini grant)
Budget: 4.000,00 €
Role: Team member

- Conducted fieldwork using diverse sampling methods, including electrofishing, gill nets, and seine nets, to gather fish specimens and environmental data
- Performed swimming performance experiments on native species (e.g. *Squalius alburnoides*) and invasive species (e.g., *Alburnus alburnus*)

2016 – 2019: FRISK: Freshwater fish InvaSions RisK assessment: identifying invasion routes (Ref: PTDC/AAG-MAA/0350/2014)
Funding: Fundação para a Ciência e Tecnologia (FCT)
Budget: 188.154,00 €
Role: Team member

- Conducted fieldwork using diverse fishing gear (electrofishing, seine-nets) for fish sampling and ensured accurate environmental data collection
- Contributed to the preparation conference abstracts, and peer-reviewed manuscripts, ensuring accurate

dissemination of project findings
- Applied statistical tools and methodologies to analyze ecological data, providing insights into invasion pathways and risks

2009 – 2010: Establishment of a monitoring system and assessment of the environmental status of the riverine systems Louros and Arachthos and the area of the Ambracian gulf. Making of soil maps and controlling the quality of soils of lowland areas of the Northern Ambracian and analyzing of the abiotic and biotic parameters at the bottom of the Ambracian gulf and their correlation with the fish production".
Funding: OIKOS Nature Management Ltd
Role: Team member
- Experienced in the collection, identification, and handling of various fish species for research
- Applied statistical methodologies to analyze ecological datasets
- Contributed to the writing and publishing of technical reports and research papers

2009 - 2010: Environmental impact assessment of the SHP Axios II project, total power 10.245 MW (Municipalities of Axioupolis & Polykastro, N. Kilkis).
Funding: OIKOS Nature Management Ltd, University of Ioannina
Role: Team member
- Participation in field surveys for fish and environmental data collection in diverse ecological settings
- Skilled in analyzing large environmental and biological datasets, including data cleaning and processing
- Assisted in the production of technical reports, conference abstracts, and peer-reviewed manuscripts

2008 –2009: Reproduction and rearing of polychaeta under controlled laboratory conditions.
Funding: Ministry of rural development and food
Role: Team member
- Experienced in designing experiments to test hypotheses related to polychaeta reproduction under varied environmental conditions
- Skilled in using statistical methods to interpret data
- Supported the creation and dissemination of technical reports, and conference abstracts

2008: A Comparative study of the parasitic fauna of fish from the regions of Kavala (Aegean Sea), Messolonghi Lagoon (Ionian Sea) and Montenegro Coast (Adriatic Sea).
Funding: General Secretariat for Research and Technology.
Role: Team member
- Skilled in conducting systematic fish sampling and environmental data collection in marine and lagoon environments.
- Competent in processing and analyzing ecological and parasitological data using statistical tools
- Skilled in writing technical reports and peer-reviewed scientific papers

2007-2008: Education and integration of the local communities around the rivers Kalamas (Ioannina, Thesprotia) and Ofanto (Canosa, Barletta).
Funding: INTERREG IIIA Greece – Italy
Role: Team member
- Experienced in identifying diverse fish and zooplankton species as part of ecological monitoring
- Competent in handling and refining large environmental and biological datasets for analysis
- Skilled in crafting and delivering educational content tailored to diverse audiences

2007: ECODO-NET - Development of a standard online virtual observatory (ECODO) of Acheron, Kalamas and Torre Guaceto ecosystems and its implementation as a mobile exhibition and a permanent environmental pavillion to raise public awareness and sustainable development of coastal ecosystems.
Funding: INTERREG IIIA Greece – Italy.
Role: Team member

- Skilled in the identification of fish and zooplankton groups essential for ecological monitoring
- Efficient in using statistical methods for analyzing large datasets
- Experienced in composing technical reports and peer-reviewed manuscripts

8. Supervision, teaching and mentoring

8.1 Supervision

- 2017: Co-supervisor, MSc thesis "Effects of invasive fish and temperature on the foraging success of Southern Iberian chub" (Alexa Kodde)
  MSc in Ecology and Environmental Management, Faculty of Sciences, University of Lisbon (in collaboration with Prof. Filomena Magalhães, FCUL/CE3C).

8.2 Mentoring and tutoring

- 2023: Mentor of two PhD students (Pradeep Kumkar and Chandani Verma, Czech University of Life Sciences Prague), within the MEGAPREDATOR project (Erasmus+).
- 2022: Mentor of postgraduate student Emmanouela Karaveti (University of the Aegean), project "Evaluation of the ecological consequences of hybridization of the invasive *Alburnus alburnus* with native species" (Erasmus+ internship).
- 2022: Tutor, Ecology training week, IGC – IBB PhD Program (9–13 May 2022 and 12–16 December 2022).

8.3 Participation in Juries

- 2024: Opponent, MSc thesis "Behavioral Interactions between Native and Invasive Fish Species" (Marta Capelas Luiz)
  MSc, in Conservation Biology, School of Sciences and Technology University of Évora, Portugal

8.4 Teaching

- 2011: Teaching assistant, University of Ioannina – Courses: Hydrobiology; Aquaculture
- 2009: Teaching assistant, University of Ioannina – Course: Ichthyology
- 2008: Teaching assistant, University of Ioannina – Course: Ichthyology

8.5 Examination

- 2024: Opponent, MSc thesis "Behavioral Interactions between Native and Invasive Fish Species" (Marta Capelas Luiz)
  MSc, in Conservation Biology, School of Sciences and Technology University of Évora, Portugal

9. Consulting services

2025: OneSTOP Datathon Workshop, 25 – 27 November, Brussels, Belgium
Funding: OneSTOP Horizon Project – OneBiosecurity Systems and Technology for People, Places and Pathways, Co-financed by the European Union (Horizon Europe)
Role: Participant of Biological invasions group (MARE-FCUL)

- Worked on cleaning, managing and enriching introduced and invasive species checklists
- Engaged with case studies (Belgium, Cyprus, Portugal, Romania) to compare approaches for updating national checklists and maintaining data quality
- Contributed to discussions and hands-on sessions on data management, terminology, guidelines, and

optimisation for national IAS lists.

2025: Monitoring of the fish community in Alqueva Reservoir
Funding: EDIA
Role: Team member
- Supported field sampling campaigns for fish community monitoring
- Assisted with species identification and data quality control
- Contributed to data analysis and preparation of technical deliverables/reports for the client

2021 – 2024: LARVA: Monitoring of the cyprinid larvae community in water bodies of the Guadiana and Sado basins
Funding: AQUALOGUS
Role: Team member
- Conducted field surveys to collect fish larvae and benthic macroinvertebrates across multiple reservoirs
- Performed detailed laboratory identification of fish larvae and macroinvertebrate larvae
- Applied statistical methods to analyse and interpret ecological datasets and support project reporting

2021 – 2022: National Plan for the Control and Management of the European Catfish
Funding: Fundo Ambiental (N.º 343/2021)
Role: Team member
- Contributed to technical tasks supporting the development of a national control and management plan
- Supported data compilation/processing and synthesis of evidence to inform management recommendations
- Assisted in drafting technical outputs and communicating results within the project team.

10. Participation in academic and scientific management

10.1 Guest editor

2023 - 2025: Guest editor of the special issue "Impacts of Invasive Freshwater Fish on Native Fauna and Aquatic Ecosystems" for the journal Diversity
https://www.mdpi.com/journal/diversity/special_issues/90O7JJ3YDK

10.2 Reviewer services

- Referee for journals (listed alphabetically): Acta Zoologica; Aquatic Invasions; Aquatic of Living Resources; Aquatic Sciences; Bioinvasions Records; Biological Invasions; Diversity; Ecology and Evolution; Fishes in Mediterranean Environments; Fisheries Management and Ecology; Hydrobiologia; Journal of Applied Ichthyology; Journal for Nature Conservation; Knowledge and Management of Aquatic Ecosystems; Limnology; NeoBiota; Turkish Journal of Zoology; Zoology in the Middle East

10.3 Organization of scientific meetings

- 2024: Member of the organizing committee for the 13th International Conference on Biological Invasions, Faculty of science, University of Lisbon, Lisbon, September 03-06.
- 2022: President of the organizing committee of the online International conference "Impacts of invasive species on food web structure", Faculty of Science, University of Lisbon, Lisbon, July 11 – 12. (https://isoinva.section-one.pt/symposium.html).
- 2022: Organizer of the seminar "Uncovering historical records locked inside museum collections", Faculty of science, University of Lisbon, Lisbon, July 13 (https://isoinva.section-one.pt/symposium.html).
- 2014: Member of the organizing committee for the 5th Iberian Congress of Ichthyology, National Museum of Natural History and Science, Lisbon, June 24-27.
- 2014: Co-organizer of the workshop Non-native fishes in European freshwaters: Lessons from different countries and risk assessment protocols, Faculty of Science, University of Lisbon, Lisbon, February 11.

10.4 Professional associations

- Member of Iberian Society of Ichthyology (SIBIC)

11 Other relevant information

11.1 Grants and fellowships

- 2018: IC&DT Projects in all Scientific Domains (LISBOA-01-0145-FEDER-029105 & PTDC/CTA-AMB/29105/2017)
- 2013: FCT Postdoctoral Fellowship (SFRH/BPD/84859/2012)
- 2008: Erasmus programme at Ca´ Foscari University of Venice
- 2003: CIMO Bilateral Scholarship at University of Jyväskylä

11.2 Scientific training (courses/workshops)

- 3rd international workshop on "the ecological impacts of Biological Invasions worldwide (InvaPact III)", 1 – 7 November 2025, Girona, Spain
- Investigation of aquatic ecosystems with drones, 5 November 2024, Évora, Portugal
- Machine learning for image-based species classification, 29 - 30 November 2023, Figueira da Foz, Portugal
- Aquatic Invasive Species (AIS): Detection mechanisms and assessment tools for management, 8 March 2023, Lisbon, Portugal
- Follow the food! Using food webs as indicators of ecosystem functioning, 17 – 18 January 2023, Évora, Portugal
- Data exploration, linear regression, GLM and GAM with R, 3-7 February 2020, Lisbon, Portugal
- The Survivor's Guide to Stable Isotope Ecology III, 30 March - 6 April 2019, Sicily, Italy
- Non-native fishes in European freshwaters: Lessons from different countries and risk assessment protocols, 11 February 2014, Lisbon, Portugal.
- Conservation of fish fauna and climate change in Mediterranean-type streams, 20-21 November 2013, Évora, Portugal.
- Course of fish identification of Portuguese fluvial ecosystems, 6-10 May 2013, Lisbon, Portugal
